The Course:

This course is designed to expose graduate students to quantitative analysis in planning. During the semester you will develop the skills needed to plan and organize analysis for sound research projects. You will be responsible for a number of assignments. Each is designed to build planning analysis skills. The semester goes by very quickly. Be diligent in your work and budget your time wisely. The required readings apply directly to the assignments. Be prepared to discuss and apply them in class. Late assignments will not be accepted.

The activities and requirements for the course are outlined in this syllabus. During each lecture we will discuss the relevant readings and assignments. During each lab we will apply our new skills to exercises and assignments.

If you have any questions during the semester, please bring them to your professor's and/or the TA's attention. Your professor will be available during his office hours and by appointment. Also, you may contact him by phone or e-mail.
